

UWT Faculty Council on Academic Policy
Meeting Minutes
March 1, 2007

The committee reviewed materials related to Global Honors and makes the following recommendations:

- 1) Global Honors should be recognized on student transcripts at graduation.
- 2) Financial support for the study abroad part of the Global Honors experience is an important and necessary part of the program. The current \$1000 per student is insufficient to pay for study abroad. The program should find ways to continue funding study abroad experiences for students and to increase the amount allocated for each student.

The committee also raised the question, "How and when should new programs or entities (such as Global Honors) be reviewed?" This question will be addressed in future discussions.
