STAKEHOLDER FEEDBACK GUIDANCE

As a recognized stakeholder, you will have two opportunities to comment on new or modified program proposals. There will be a 10-business day review during the PNOI and Full Proposal stages of the process. See the Undergraduate Degree Flowchart, Graduate Degree Program Flowchart, or Graduate Certificate Flowchart for more information. If feedback is not received from your office, we assume you do not have any comments on the proposal.

As part of our new program proposal process, an essential part of the review involves gathering stakeholder feedback from key UWT departments. This is a crucial step to assess potential impacts or demands a new program may have on resources and gather comments about the proposed program content. There is no requirement to provide feedback, but it is the department's opportunity to comment, show support, and/or raise questions. The feedback is shared with the Academic Policy and Curriculum Committee (APCC) during their review and approval process.

Feedback will be collected on the APCC's Canvas page. Contact the Faculty Assembly Administrator (assemly@uw.edu) for access.
